## HIGH TECH HEARING AIDS

Did you know that some hearing aids can link to your TV, your car stereo, or your smartphone for the best sound quality? Others can act as fitness trackers and even call for help if the wearer falls. Wow – What a great investment in your health! Remember that **HEAR in America** benefits can be used for anyone in your extended family. Just call **1-800-286-6149** to register.

## APPLES TO APPLES

When shopping for hearing aids it can be difficult to “compare apples to apples.” Some offers have a lower up-front price, but don't include the other benefits we do or aren't for identical hearing aids. In one case where we compared apples to apples with a competitor our benefits saved \$1,230 over three years!

*Please call us if you think you found a better offer so we can help you compare apples to apples.* Hearing benefits are NOT all the same!

## ABOUT INSURANCE?

Insurance coverage for hearing aids is complex. With varying eligibility, copays, deductibles, networks and pre-authorizations, it is important that we confirm your coverage to know what to expect. Some plans aren't as good as they sound at first because of limited access to hearing aid brands, service providers, and ongoing services.

Some of our members have found that they got the best value overall by using our benefits rather than their limited insurance coverage. Some lucky people are able to use both their insurance payment and our benefits together – and we even file the claim.

## DEAR RPEC MEMBERS,

Research shows that untreated hearing loss is linked with many negative effects, including Alzheimer's disease and dementia. Hear In America provides opportunities for all

of our members and their families (regardless of whether they live in your household or not) to get a free hearing screening plus a benefit package if hearing aids are needed. If you have ever wondered whether someone in your family may have a hearing problem, this is a perfect opportunity to find out.

Highest Regards,

*Kandy Kraig*

## A TESTIMONIAL

"I paid \$800 for a pair of hearing aids costing \$5,000! Hear In America not only arranged appointments and follow ups with the audiologist but handled the negotiations with my insurance company! Wicked awesome service and savings!"

— Trudy in Massachusetts
